CLIMATE TECH MARKETPLACE
CUTTING EDGE ENVIRONMENT: LEADING INVESTMENT IN THE GREEN REVOLUTION

The Climate Tech Marketplace had hopes of hosting an in-person event, but due to the COVID-19 pandemic the Bay Area Air Quality Management District made the strategic decision to make the pivot and continue to host this event in a virtual setting. This one-day event served to connect climate technologies with potential customers. This free event included a technology showcase, panel discussions, and brought together shovel-ready climate technologies, local elected officials, private investors, and technology customers.

This one-day event was held on Thursday, October 22, 2020. The program began with a keynote address followed by a series of panel discussions and concluded with a Live Technology Marketplace. The keynote speaker was Prof. Mariana Mazzucato, a recognized author and economist who helped shape the Green New Deal. Panel discussions featured leading innovators, technology developers, and leaders in the climate software space. The Live Technology Marketplace consisted of 34 cutting-edge climate technology and financing exhibitors.

SCHEDULE AT A GLANCE

Time	Session
10:00 AM - 10:45 AM	Keynote Address by Prof. Mariana Mazzucato
10:45 AM - 11:30 AM	Panel Discussion: Public Sector Innovation in Real Time
